## 4th Grade Math Homework Week 4

Name

| Labor Day | Tuesday: | Wednesday: | Thursday: |
| :---: | :---: | :---: | :---: |
| Use these spaces if you need to work out problems | Estimate the answer first, then solve below <br> What is the estimated sum of 43,294 and 29,834? | Estimate the answer first, then solve below $\qquad$ <br> What is the estimated difference of 57,403 and 23,622 | About 300,000 people went to the fair. Which could be the exact number rounded to 300,000 ? <br> a. 248,549 <br> b. 284,952 <br> c. 356,217 |
|  | Round the number to the underlined place $149, \underline{733}$ | Solve $\begin{array}{r} 43,294 \\ +29,834 \\ \hline \end{array}$ | Solve. $\begin{array}{r} 57,403 \\ -23,403 \\ \hline \end{array}$ |
|  | Which number is 74,805 rounded to the nearest thousand? <br> a. 74,800 <br> b. 74,000 <br> c. 75,000 <br> d. 75,800 | Round the number to the nearest thousand 672,485 | Mr. Klem traveled 35,395 miles on an airplane last year and 29,843 miles this year. How many total miles has he traveled? |
|  | The coastline of the United States is 12,383 miles long. Canada's coastline is 113,211 miles longer than the coastline of the United States. How long is the Coastline of Canada? | $\text { Solve } \begin{array}{r}  \\ 53,605 \\ -6,431 \\ \hline \end{array}$ | In 2007, Pennsylvania had approximately 121,580 miles of public roads. What is 121,580 rounded to the nearest thousand? |
|  | Mrs. Pulley saved $\$ 50,684$ from the runraiser. She spent $\$ 32,912$ on chrome books and $\$ 456$ on playground equipment. How much money does she have left? <br> Use the box next door $\qquad$ to solve! | One weekend, 125,429 came to watch a baseball game. The next weekend 86,353 people came to the game. How many people in all watched the games? | There were 1,538 cows on the farm in August. Three hundred cows were sold to another farm and 254 new babies were born. How many cows do they have now? |
